Empathy Map Canvas

An empathy map helps to understand the user's behavior, needs, and problems while handling employee data manually.

User: HR Manager

Thinks

- **Employee data management is time-consuming**
- **Manual work leads to errors**
- **Need a faster and efficient system**

Sees

- **Multiple Excel sheets and paper records**
- **Data duplication and confusion**
- **Lack of proper system**

Hears

- **Complaints from employees about delays**
- **Management asking for quick reports**
- **Team members struggling with data**

Says

- **"This process is too slow"**
- **"We need automation"**
- **"There are too many errors"**

Does

- **Maintains records manually**
- **Updates employee data repeatedly**
- **Checks and corrects errors**

Pain

- **Time-consuming process**
- **High chance of mistakes**
- **Difficulty in accessing data**
- **Work overload**

Gain

- **Fast and automated system**
- **Accurate data management**
- **Easy access to employee details**
- **Reduced workload**

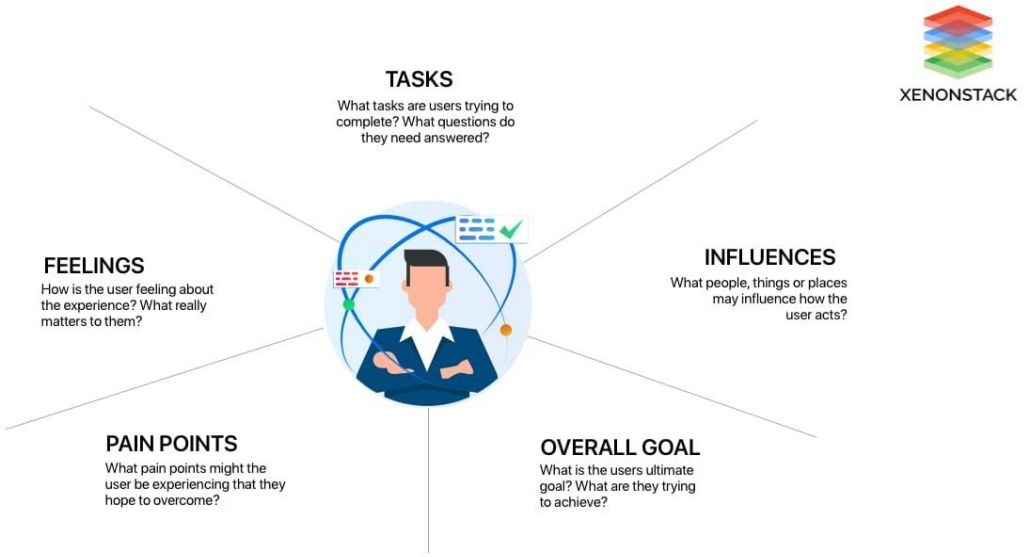
Example:



XENONSTACK
TASKS
What tasks are users trying to complete? What questions do they need answered?
FEELINGS
How is the user feeling about the experience? What really matters to them?
INFLUENCES
What people, things or places may influence how the user acts?
PAIN POINTS
What pain points might the user be experiencing that they hope to overcome?
OVERALL GOAL
What is the users ultimate goal? What are they trying to achieve?
