Project Design Phase-II
Data Flow Diagram & User Stories

Date	25 MARCH 2026
Team ID	69c0d503f58a227701cdee5a
Project Name	AUTOMATING EMPLOYEE DATA
Maximum Marks	4 Marks

Data Flow Diagrams:

1. Data Flow Diagram (DFD)

Level 0 (Context Diagram)

This shows the overall system as a single process.

Entities:

- Employee
- HR/Admin

Process:

- Employee Data Management System

Data Flow:

- Employee → submits personal details, attendance, leave requests
- HR/Admin → manages employee records, approvals
- System → stores and retrieves data

Representation (Text Format):

[Employee] ---> (Employee Data Management System) ---> [Database]
[HR/Admin] ---> (Employee Data Management System)

Level 1 DFD (Detailed Diagram)

Processes:

1. Employee Registration
2. Attendance Management
3. Leave Management
4. Payroll Processing
5. Report Generation

Data Stores:

- Employee Database
- Attendance Records
- Leave Records
- Salary Records

Flow Explanation:

- Employee enters details → stored in Employee DB
- Attendance marked → stored in Attendance Records
- Leave request → HR approves/rejects → stored in Leave Records
- Payroll processed → Salary Records updated
- Reports generated → sent to HR/Admin

Representation:

[Employee] → (1. Registration) → [Employee DB]

[Employee] → (2. Attendance) → [Attendance Records]

[Employee] → (3. Leave Request) → (HR Approval) → [Leave Records]

[System] → (4. Payroll Processing) → [Salary Records]

[HR/Admin] → (5. Generate Reports)

---

2. User Stories

User stories describe system features from the user's point of view.

Employee User Stories

- As an employee, I want to register my details so that my data is stored in the system.
- As an employee, I want to mark my attendance daily so that my work hours are recorded.
- As an employee, I want to apply for leave so that I can take time off when needed.
- As an employee, I want to view my salary details so that I can track my earnings.

HR/Admin User Stories

- As an HR, I want to add/update employee records so that the database stays accurate.
- As an HR, I want to approve or reject leave requests so that employee absence is managed.
- As an HR, I want to process payroll so that employees receive correct salaries.
- As an HR, I want to generate reports so that I can analyze employee data.

System User Stories

- As a system, I want to store employee data securely so that information is safe.

- As a system, I want to automate calculations (salary, attendance) so that errors are reduced.
- As a system, I want to generate reports automatically so that HR work is easier.

Example: (Simplified)

User Stories

Use the below template to list all the user stories for the product.

User Story

Title:	Priority:	Estimate:
User Story: As a [description of user], I want [functionality] so that [benefit].		
Acceptance Criteria: Given [how things begin] When [action taken] Then [outcome of taking action]
